## SUPPORT FOR PARENTS AND CARERS

### What is a mental health carer?

A mental health carer is a person who:

- Is a family member or friend who plays a vital role in supporting a person with mental ill health.
- Provides emotional and practical support helping a person living with mental ill health.
- May not even think of themselves as a 'carer'. They have found themselves in this role because they see it as part of their relationship with the person who is affected.
- May be a parent of someone with mental ill health, or an adult caring for a partner, parent or friend. A child who looks after a family member with mental ill health, such as a parent, can also be a carer.
- May not necessarily live with the person they care for.
